EDUCATION

B.Tech in Robotics and Automation , CGPA: 9.1

Symbiosis Institute of Technology , Pune

12th (Science) CB5E , Percentage: 88

The Orchid School , Pune

10th ICSE , Percentage: 97

Vidya Valley School , Pune

SKILLS

- Python (Pandas, NumPy, Matplotlib, Seaborn(basic), Scikit-Learn(basic)
- C++
- MATLAB
- Basic CAD
- Hydraulics
- Pneumatics
- PLC Programming (Delta DVP / WPLSoft)
- HMI Design (Delta DOP-107CV)
- Electrical Panel Wiring & Fabrication
- Servo Motor & Ball Screw Systems
- Sensor Integration & Calibration
- Arduino / ESP-32 (C/C++)
- IoT Protocols (Wi-Fi, REST API, MQTT)
- NDT Methods (UT, MPT, DPT)

PROFILE

Enthusiastic Robotics and Automation engineering student with a strong foundation in programming, sensor systems, and machine learning. Passionate about building intelligent, real-world engineering solutions by combining analytical thinking with hand-on experimentation. Seeking an internship that offers opportunities to work on innovative projects, learn frschnology-driven problem solving.

WORK EXPERIENCE

IkodeAutomation 2025
- Role: Automation Engineering Intern
- Built a PLC-Controlled Universal Testing Machine (UTM) for paper tear strength evaluation in the packaging industry
- Assembled aluminum extrusion frame with servo motor and ball screw drive
- Wired and fabricated complete electrical control panel from scratch
- Programmed Delta DVP-14SS2 PLC using WPLSoft (ladder logic) for automated test sequences
- Configured Delta DOP-107CV HMI with real-time force vs displacement graphs
- Integrated 1000 kgf load cell with signal conditioning and calibration

QC Intern 2024
- H.C. & Company
- Performed quality control on heavy-duty machined components: shafts (up to 5m), rollers, breech sections, weldments
- Used NDT methods: Ultrasonic Testing (UT), Magnetic Particle Testing (MPT), Dye Penetrant Testing (DPT)
- Operated 15+ precision instruments including Vernier calipers, micrometers, bore gauges, height gauges, surface roughness testers
- Inspected components for major clients: Metso Outotec (mining) and L&T Defence
- Documented inspection results per ISO 9001:2015 standards
- Participated in internal quality audits

PROJECTS

Algerian Forest Fires Prediction
- Built a Stacking Ensemble classifier combining Logistic Regression, SVM (RBF kernel), and Random Forest
- Achieved 97.96% accuracy, 98.25% F1-score, and ROC-AUC of 1.000
- Used Algerian Forest Fires dataset (244 instances, FWI weather components)
- Team project under Dr. Satish Kumar V.C. at SIT Pune

Arduino & IoT Sensor Systems (Expanded)
- Developed environmental monitoring system using ESP-32 and DHT11 sensor
- Real-time data upload to ThingSpeak cloud (Channel #3060088) via Wi-Fi REST API
- Additional experiments with HC-SR04 ultrasonic and IR sensors on Arduino
- Raspberry Pi integration for edge processing

MATLAB Control System Analysis (Expanded)
- Analyzed 6 DC motor control systems for 3 industrial applications (robotic arm joint, conveyor belt, heavy-duty robot)
- Both armature-controlled and field-controlled configurations
- Generated step response, Bode plots, and pole-zero maps
- Evaluated stability margins (gain margin, phase margin) for each system

SOFT SKILLS

- Strong problem-solving and analytical thinking
- Clear communicator and adaptable team player
- Resilient and reliable under pressure
- Detail-oriented with a focus on precision and quality

ADDITIONAL INFORMATION

- Top scorer in Engineering Mechanics & Materials, Engineering Mathematics I, Physics, and Chemistry
- Quick to learn new technologies and adapt to technical environments
- Strong interest in robotics, automation, and data-driven engineering
